

ABSOLUTE SEPTIC SERVICE

– FREE GUIDE –

Properly maintaining your Septic Tank could save you Thousands of Dollars!
Knowing your Septic Systems Condition an important part of protecting your investment.

Do's

- Know the location and the capacity of your Septic Tank System**
- Have a qualified person inspect the tank at least every three years.**
- Have tank pumped when the combined depth of sludge and scum equals 1/3 of the tank liquid volume.**
- Install the system so that rainfall and surface water will flow away from the drain field.**
- Rain water from a roof should not discharge onto the drain field.**
- Grow grass or small plants above the system.**
- Install water conservation fixtures or devices to reduce the total volume of water entering the system.**
- Keep Plumbing fixtures such as toilets and faucets in good repair to prevent leakage and wasting of water.**

Don'ts

- Never flush paper towels, newspapers, wrapping paper, rags or sticks into the system.**
- Never allow large, irregular, intermittent or constant volumes of clear water into the system, as with a leaking toilet or faucet.**
- Never over-use ordinary household cleaning chemicals that will be flushed into the system.**
- Never pour out or empty hobby or home industry chemicals into the system.**
- Never allow waste from water softeners to enter the system.**
- Never allow grease or other bulky waste to enter the system.**
- Never flush toxic materials such as pesticides into the system.**
- Never plant trees or shrubbery in the drainfield.**
- Never allow vehicles (cars, trucks etc.) to drive across or park on the drain-field. (Protect it from being crushed.)**
- Never Waste Water**
- Never use chemicals solvents to clean plumbing lines or a septic tank system.**
